

ORDERING GUIDE

How to Order a Gang Sheet

Louisiana Shirt Co. · Formerly DTF Gang · louisianashirtco.com

A gang sheet is one large sheet you fill with as many designs as will fit. You pay by the sheet size, not per design. Here is how to build your first one.

300 DPI

RECOMMENDED RESOLUTION

PNG

TRANSPARENT BACKGROUND

22 in

SHEET WIDTH

1

Choose DTF or UV DTF

DTF is for fabric (shirts, hoodies, hats, totes). UV DTF is a stick-on transfer for hard surfaces (cups, tumblers, glass, metal).

2

Pick your sheet size

Select a size from the dropdown. Bigger sheets fit more designs and lower your cost per print.

3

Click "Build your own Gang Sheet"

The builder opens right on the product page. No design software needed.

4

Upload your artwork

Upload high-resolution PNG files with transparent backgrounds. Drag, resize and duplicate designs, or use auto-fill to pack the sheet.

5

Check your preview

Zoom in to confirm every design is sharp, sized correctly and not overlapping. What you see is what we print.

6

Add to cart and check out

Order by 12 PM CST for same-day shipping, or by 1 PM CST for same-day local pickup.

PRO TIPS

- Leave about 0.25 in between designs so they are easy to cut apart.
- Remove white boxes and backgrounds. Anything that is not transparent will print.
- Very thin lines and tiny text (under about 1 mm) may not transfer well. Thicken them before uploading.
- Measure your garment first. Typical adult front prints run 10 to 12 in wide.
